In response to your request, I release the claim of Confidential Business Information that was erroneously included on CSC's cover letters that accompanied our deliverables to EPA associated with quality assurance review of the Upper Animas Mining District/Upper Cement Creek site under our HRS contract.

Please contact me if you have any questions or need additional information.
Thank you.

Deborah Miller

Leslie, I just spoke with Terry about maintaining the Deliberative Process/Pre-decisional status of the CSC-generated Technical and QA support documents and teleconference records. That privilege will be

maintained.

However, since they are CSC drafted documents, which CSC understands are not actually CBI, EPA Region 8 requests that CSC please email me and Richard Sisk a message that releases the claim of CBI for these documents.

Sincerely,
Sabrina Forrest

Katharine, I don't know if you are the decision maker on such things, but most if not all CSC deliverables tend to have a CBI stamp on the cover, with the assumption that the attached technical support information is also CBI.

In particular, we have a FOIA for the Upper Animas Mining District/Upper Cement Creek and our attorney has asked me to have CSC confirm that the CSC Technical Support memos and notes are in fact to be maintained as CBI. If so, we need CSC to substantiate why maintaining CBI is in CSC's interest.

As is typical with FOIAs, this is time sensitive and Richard Sisk was hoping to have this information today, or just as soon as possible. Please reply to both Richard Sisk and me.

Thanks for your assistance in this matter.

Sincerely,

Sabrina Forrest
